

# Polycom® RealPresence® Group Series

Polycom announces the new release of Polycom® RealPresence® Group Series system. This document provides the latest information on the following Polycom software:

- Version 6.2.0 of the Polycom RealPresence Group Series system software
- Version 2.1.0.5 of the Polycom® EagleEye™ Director II camera software
- Version 2.2 of the Polycom® EagleEye™ Director software
- Version 1.2.2 of the Polycom® EagleEye™ Producer software
- Version 6.2.0 of the Polycom® RealPresence Touch™ Panel software
- Version 2.2.0 of the Polycom RealPresence Touch Operating system software
- Version 6.2.0 of the Polycom® Touch Control™ Panel software
- Version 6.2.0 of the Polycom Touch Control Operating System software

## What's New

RealPresence Group Series system software version 6.2.0 provides the functionality described in the following sections:

- [Web Proxy Auto-Discovery Protocol](#)
- [Dial Plan Normalization](#)
- [Large Conference Meetings](#)
- [Managing the RealPresence Touch Device](#)
- [Managing System Software](#)
- [Microsoft Quality of Experience Monitoring Server Protocol](#)
- [Simple Certificate Enrollment Protocol \(SCEP\)](#)
- [802.1x Authentication Support on RealPresence Touch Device](#)
- [Microsoft Surface Hub with RealPresence Group Series](#)

### ***Web Proxy Auto-Discovery Protocol***

The Web Proxy Auto-Discovery Protocol (WPAD) allows RealPresence Group Series systems to route network traffic outside enterprise networks.

When your RealPresence Group Series system uses Web Proxy, inbound HTTP and HTTPS traffic (ports 80 and 443) is directed to the configured proxy or proxies. The Proxy auto-config (PAC) file is a configuration file executed by the system to determine the proxy for a specified URL.

Your system communicates with a proxy using the following mechanisms:

- Digest authentication (with either MD-5 or SHA-256 digest)
- NTLM authentication (only NTLMv2 is supported)
- No authentication (or null authentication, meaning the proxy server does not require credentials)

By default, the Basic authentication is disabled. You can enable Basic authentication in RealPresence Group Series system web interface.

RealPresence Group Series system supports the following services when configured with Web Proxy:

- Directory servers
- Provisioning service
- Calendaring service
- Recording service
- Software updates
- Upload Logs

### ***Dial Plan Normalization***

Dial Plan Normalization enables you to use the dial plans configured on the Skype for Business server.

## ***Large Conference Meetings***

You can provision RealPresence Group Series systems to join large conference AVMCU and Skype for Business meetings. RealPresence Group Series system has the ability to join large conference meeting with up to 250 participants in a call.

## ***Managing the RealPresence Touch Device***

The RealPresence Touch device now displays the full keyboard option when connected with RealPresence Group Series in Skype for Business mode, which allows the users to make the IP dialing calls.

## ***Managing System Software***

Polycom recommends that you upgrade your software to the latest available release. Downgrade feature is only available from 6.2.0 version of RealPresence Group Series.

## ***Microsoft Quality of Experience Monitoring Server Protocol***

Using Microsoft's Quality of Experience Monitoring Server Protocol (QoE), you can monitor the audio and video quality and troubleshoot audio and video related issues in your deployment. When Skype for Business monitoring is available, the RealPresence Group Series systems publish QoE metrics for each SIP session hosted on the Skype for Business Server. QoE reports contain audio and video metrics only and do not contain content sharing metrics.

## ***Simple Certificate Enrollment Protocol (SCEP)***

SCEP is a protocol used to automatically request and renew the certificates in large deployments of endpoints/software clients which uses certificates for authentication.

## ***802.1x Authentication Support on RealPresence Touch Device***

A new layer of authentication is added to Polycom RealPresence Touch device. It provides an authentication mechanism to devices trying to access a LAN or WLAN. The device connected has to first authenticate itself using the Extensible Authentication Protocol EAP before it can communicate with other devices on the LAN.

## ***Microsoft Surface Hub with RealPresence Group Series***

Microsoft Surface Hub is now compatible to make calls, and share content from RealPresence Group Series 6.2.0.

## ***Polycom Labs Experimental Features***

Polycom releases some experimental features during a release that administrators can enable and evaluate in non-production environments.

Experimental features are neither tested nor supported. These features might or might not become official features in a future release.

The following experimental features are available in this release:

- [VisualBoard Advanced Features](#)
- [Incoming NoiseBlock](#)
- [Acoustic Fence with Beam Shaping](#)
- [Auto Awake for Polycom EagleEye Producer Camera](#)
- [Content Stretch](#)
- [Dual Live-Stream](#)
- [Stamping Log Files](#)

For more information about experimental features or to provide feedback on your experience, visit the [Polycom Support Community](#).

## **Enable Experimental Features**

You can enable experimental features and evaluate them in a non-production environment.

### **To enable the experimental features:**

- 1 In the web interface, select **Admin Settings > General Settings > System Settings > Polycom Labs**.
- 2 Select the **Enable Polycom Labs Features** check box.

## **VisualBoard Advanced Features**

You can enable the following experimental features for VisualBoard:

- **Enable PowerPoint Slide Conversion:** Show PowerPoint document files while working in VisualBoard.
- **Allow Slide Zoom:** Enlarge a slide by moving two fingers in opposite directions while in drawing mode.
- **Allow Swipe Navigation:** Move to the next slide by swiping, or fast dragging, while in pointer mode.

## **Incoming NoiseBlock**

When you enable the Incoming NoiseBlock feature, the RealPresence Group Series system automatically senses ambient noise in the far-end audio and mutes the loudspeaker. Ambient noise can include keyboard typing, paper shuffling, or any sounds other than human speech. As soon as the far-end meeting participant begins speaking, the system automatically unmutes the loudspeaker.

If you enable Incoming NoiseBlock on a RealPresence Group 500 or 310 system and connect a computer to the RealPresence Group Series system HDMI input port as the content source, the audio from the HDMI input may fade in and out at the local end.

## Acoustic Fence with Beam Shaping

Acoustic Beam greatly reduces sounds outside a well-defined beam. The beam width can vary from +/- 10 degrees to +/- 60 degrees. A single tabletop microphone, a single ceiling microphone, or a single EagleEye Acoustic camera forms the beam using signal processing on the microphones contained in the unit.

For additional information configuration information for Acoustic Fence with Beam Shaping Technology, see the [Polycom Acoustic Fence and Acoustic Fence with Beam Shaping Technology Technical Bulletin](#).

You can't enable the Acoustic Fence with Beam Shaping and Acoustic Fence Technology features at the same time. To disable Acoustic Fence, in the web interface, go to **Admin Settings > Audio/Video > Audio > General Audio Settings**. Clear the **Enable Acoustic Fence** checkbox.

The Acoustic Fence with Beam Shaping feature also includes Beam Mode. The default setting is automatic steering beam, which automatically steers the beam to the meeting participant who is talking. You can also set Beam Mode to a fixed beam, which only picks up audio within a set beam.

### To enable and configure Acoustic Fence with Beam Shaping:

- 1 In the web interface, select **Admin Settings > General Settings > System Settings > Polycom Labs**.
- 2 Under **Acoustic Fence with Beam Shaping**, select **Enable Acoustic Fence with Beam Shaping**.
- 3 Select a **Beam Mode** and save your settings.

## Auto Awake for Polycom EagleEye Producer Camera

This feature enables an EagleEye Producer to automatically wake up when it detects the presence of people or faces.

## Content Stretch

This feature allows RealPresence Group series systems to stretch the content to fit the monitor. When you enable this feature, the system shows content the full screen without the black bars, even if the receiving content aspect ratio isn't 16:9.

## Dual Live-Stream

This feature is only supported on RealPresence Group 700 systems. This feature adds the ability to combine two cameras as a single camera source. The encoded stream sent to the far site consists of a single stream of encoded video that includes two camera views. The far end sees two camera views from the far site and doesn't notice a difference in call connection, negotiation, or quality.

The following layouts are supported:

- Equal size
- Main camera only
- Room camera only
- Main camera in PIP
- Room camera in PIP
- Side by side 3D
- Top and bottom 3D

## Stamping Log Files

This feature helps you in troubleshooting an issue by adding a log stamp whenever a system issue occurs. A log stamp is a numerical value that starts with 1 and increments each time you activate the feature. The log stamp value automatically restarts at number 1 when the system restarts.

When you encounter a system issue, you can add a log stamp from the RealPresence Group Series system local interface or web interface or from a RealPresence Touch that is paired with a RealPresence Group Series system.

### To add a log stamp from the RealPresence Group Series system local interface:

- 1 Go to **Settings > System Information > Diagnostics > Log Stamp**.
- 2 Click **Log Stamp**.

### To add a log stamp from the RealPresence Group Series system web interface:

- 1 Go to **Diagnostics > System > Logs > Log Stamp**.
- 2 Click **Log Stamp**.

### To add a log stamp from the RealPresence Touch interface:

- 1 Go to **Settings > System Information > Log Stamp**.
- 2 Tap **Log Stamp**.

## Security Updates

For information about known and resolved security vulnerabilities, refer to the [Polycom Security Center](#).

## Software Installation and Upgrades

Procedures for installing and updating RealPresence Group Series system software vary. With your license key, you can update directly from software version 4.0.2 or higher to 6.2.0.

When updating the system software to version 4.1.x or later, make sure you are currently running version 4.0.2 or later.

- If you are running version 4.0.0, 4.0.0.1, or 4.0.1, download and install version 4.0.2 from [Polycom Support](#) before you download and install a 4.1.x version.

If you are already running version 4.0.2 or later, you can follow the procedures described in the *Polycom RealPresence Group Series Administrator Guide* at [Polycom Support](#).

The RealPresence Touch Panel software is included in the RealPresence Group Series system software package. The RealPresence Touch Operating system software is available for download at [support.polycom.com](http://support.polycom.com).

## Hardware and Software Requirements

The following sections list the supported hardware and software versions when integrating accessories and peripherals with RealPresence Group Series systems.

### Integrating a Polycom® SoundStation® IP 7000 Conference Phone

To integrate a Polycom® SoundStation® IP 7000 conference phone with a RealPresence Group Series system, use the following software versions:

SoundStation IP 7000 Phone Software Version	RealPresence Group Series System Software Version
4.0.11 and Updater 5.0.11	5.1.2, 6.0.0, 6.0.1, 6.1.0, 6.1.1, 6.1.2, 6.1.2.1, 6.1.3, 6.1.4, 6.1.5, 6.1.6.1, 6.1.7, 6.1.7.1, 6.1.7.2
4.0.7 and Updater 5.0.5	4.3.0, 4.3.1, 4.3.2, 5.0.0, 5.0.1, 5.0.2, 5.1.0, 5.1.1
4.0.6 and Updater 5.0.x	4.2.0
4.0.4 and Updater 5.0.x	4.1.3, 4.1.3.2
4.0.4 and BootRom 5.0.1	4.1.1, 4.1.1.1
4.0.3F and BootRom 5.0.1	4.0.1, 4.0.2
4.0.2 Revision B and BootRom 5.0.1	4.0.0, 4.0.0.1

### Integrating Polycom Touch Devices

To integrate a RealPresence Touch or Polycom Touch Control with a RealPresence Group Series system, you must use a compatible software version.

When you downgrade the RealPresence Group Series system software and pair with a Polycom RealPresence Touch system, the software on the RealPresence Touch device is automatically downgraded to a compatible version. However, the RealPresence Touch platform version 2.0 software may not be downgraded automatically to version 1.0. To downgrade from version 2.0 to version 1.0, you must use a USB flash drive or manually initiate a downgrade from a server repository that includes version 1.0.

## ***Polycom RealPresence Touch***

RealPresence Touch, after pairing with a RealPresence Group Series system, verifies the compatibility of the RealPresence Touch panel software and requests a software update. Polycom recommends that you update the software on RealPresence Touch to match the RealPresence Group Series software. The RealPresence Touch operating system software version does not have to match the RealPresence Touch panel software version; however, Polycom recommends that you use the latest operating system software. You can update the RealPresence Touch operating system software through the administration pages on the RealPresence Touch or through the RealPresence Touch web interface.

When you downgrade the RealPresence Group Series system software, the Polycom RealPresence Touch software automatically downloads a compatible version after being paired. However, the RealPresence Touch platform version 2.0 might not automatically downgrade to version 1.0. In this case, to manually downgrade from version 2.0 to 1.0, you must use a USB flash drive or initiate a downgrade from a server repository that includes version 1.0.

## ***Polycom Touch Control***

The first three numbers of the Polycom Touch Control software version must match the first three numbers of the RealPresence Group Series software version. For example, Polycom Touch Control software version 6.1.1 is compatible with RealPresence Group Series software versions 6.1.1 and 6.1.1.1.

## **Integrating EagleEye Producer**

Polycom includes updates to the EagleEye Producer software with the RealPresence Group system software updates. To integrate your EagleEye Producer, connect it to the RealPresence Group system before you run a software update. The software update program detects the EagleEye Producer and updates it if necessary. You don't need a license number or key code to update the EagleEye Producer.

EagleEye Producer must run a software version that is compatible with the software version on the RealPresence Group Series system to function properly. EagleEye Producer version 1.2.2 is compatible with version 6.0.0 and higher of RealPresence Group Series. For more information, see the current [Polycom Supported Products](#) matrix at Polycom Service Policies.

## **Version History**

This following table lists the release history of RealPresence Group Series system software.

### **Version History**

<b>Version</b>	<b>Release Date</b>	<b>Description</b>
6.2.0	December 2018	Includes Dial Plan Normalization; Large Conference; Managing the RealPresence Touch, Managing System Software, Microsoft Quality of Experience Monitoring Server Protocol, Calling with Skype for Business in Polycom RealPresence Touch, Simple Certificate Enrollment Protocol, 802.1x Authentication Support on RealPresence Touch Device.
6.1.7.2	October 2018	Includes escalation fixes for customer support.

**Version History**

<b>Version</b>	<b>Release Date</b>	<b>Description</b>
6.1.7.1	October 2018	Includes escalation fixes for customer support.
6.1.7	June 2018	Includes escalation fixes for customer support.
6.1.6.1	May 2018	Includes escalation fixes for customer support.
6.1.5	February 2018	Includes VbSS (Video-based Screen Sharing), Managing Skype for Business Calls, System downgrade through SfB server, Conference recording with RealPresence Touch, Dialing through ISDN Gateway, RMX call escalation and Display call participants names.
6.1.4	November 2017	Includes escalation fixes for customer support.
6.1.3	September 2017	Includes escalation fixes for customer support, and support for EagleEye Producer version 1.2.1.5.
6.1.2.1	August 2017	Includes software enhancements for future hardware revision compatibility.
6.1.2	July 2017	Includes RealPresence Group Series remote control support for systems registered to Skype for Business Online, support for EagleEye Director II version 1.1, support for new RealPresence Touch hardware version 7, and escalation fixes for customer support.
6.1.1	April 2017	Includes Microsoft certification for Skype for Business Online, a new automatic update feature for a RealPresence Group Series system from a Skype for Business Server, and escalation fixes for customer support.
6.1.0	February 2017	Includes the initial release of Polycom EagleEye Director II Camera System, Help Desk Option on RealPresence Touch, and Microsoft Office 365 qualification fixes.
6.0.1	November 2016	Includes escalation fixes and documentation updates. Provides support for EagleEye Producer software 1.2.1.
6.0.0	September 2016	Includes new Skype for Business and Microsoft Office 365 features; provides integration of Polycom RealPresence Media Suite recording controls; adds Polycom RealPresence Cloud service interoperability and new EagleEye Producer tracking modes; provides support for MusicMode on the G.719 codec, audio-only calls, custom backgrounds, USB headsets, additional multipoint layout views on RealPresence Group 700 systems, and Polycom SoundStructure system control using the RealPresence Touch device; provides enhanced DTMF dialing and updates to persistent video layout views; includes updates to the API and documentation.
5.1.2	June 2016	Includes escalation fixes for customer support.
5.1.1	May 2016	Includes support for the Polycom Concierge solution, 4-Way Symmetric 1080p in Full Screen Mode, API command audio3p5inputfaronly, and escalation fixes for customer support.

**Version History**

<b>Version</b>	<b>Release Date</b>	<b>Description</b>
5.1.0	February 2016	Includes escalation fixes and support for the touch-enabled user interface, and updates the factory partition to version 5.1.0.
5.0.2	January 2016	Includes escalation fixes and documentation updates.
5.0.1	November 2015	Includes escalation fixes and documentation updates. Provides support for EagleEye Producer software 1.1.1.
5.0.0	September 2015	Includes support for Microsoft Office 365 calendaring, first release of the RealPresence Touch device, adds support for viewing content from Microsoft Lync desktop clients, add provisioning capabilities, includes enhancements to security for SIP applications, adds support for Lync Response Group registrations, adds Native Support for RealConnect feature, support for Link Layer Discovery Protocol (LLDP) and Link Layer Discovery Protocol Media Endpoint Discovery (LLDP/MED), new API commands, adds improvements to import and directory interface, support for new EagleEye IV mounting option, includes Acoustic Fence technology, includes update to web interface to include 3.5mm audio input, includes support for EagleEye Producer software 1.1 that has automatic camera updates, and includes support for several experimental features.
4.3.2	August 2015	Includes escalation fixes and documentation updates.
4.3.1	June 2015	Provides support for EagleEye Producer software 1.0.1.17, and corrected issues from the previous RealPresence Group Series release.
4.3.0	May 2015	Includes support for the RealPresence Group Series 310 system, using SSH for secure API access, enabling and disabling Audio Add In, and Polycom EagleEye Producer version 1.0.0.
4.3.0	March 2015	Includes support for using SSH for secure API access, enabling and disabling Audio Add In, and Polycom EagleEye Producer version 1.0.0.
4.2.0	January 2015	Includes support for additional Microsoft Lync 2013 enhancements; adds CEC monitor controls; includes SVC updates; adds support for enhanced High Definition video resolution; includes updates to receiving software updates from the web interface, and adds accessible HTML help; adds support for a visual security classification feature; includes support for People+Content IP 1.3; provides updates to the API; includes support for Polycom EagleEye Producer.
4.1.3.2	April 2014	Correction for the Heartbleed OpenSSL Security Vulnerability in third-party software.

## Version History

Version	Release Date	Description
4.1.3	February 2014	Provides native Microsoft Lync 2013 interoperability; adds support for recording on RealPresence Group 700 systems; includes more robust and secure SNMP and system logging functionality; adds support for BroadSoft BroadWorks DMS provisioning; provides support for the Polycom VisualBoard application; includes updates of SVC functionality; includes support for a new version of the Polycom EagleEye Director which has a new tracking mode; provides updates to the API.
4.1.1.1	September 2013	Includes support for additional Lync 2013 enhancements; adds Cisco TIP interoperability; replaces version 4.1.1.
4.1.1	July 2013	Provides enhanced security; includes Scalable Video Codec (SVC) updates; adds compatibility for Microsoft Lync 2013; provides remote management of the Polycom Touch Control; supports Polycom Calendering for Microsoft Outlook.
4.0.2	March 2013	Added support for the SVC protocol and RealPresence Group 700 system; enabled Monitor Profiles for configuring viewing and recording preferences.
4.0.1	January 2013	Enabled Polycom® SmartPairing™ in automatic mode with the RealPresence Mobile application on an Apple iPad; added more diagnostic features; included API support for a broadcast beacon to an AMX® NetLinx™ central controller; added support for software downgrade via USB; added support for the EagleEye Acoustic camera; updated EagleEye Director software to version 2.1, which adds camera support for 1080p with 60 frames per second.
4.0.0.1	November 2012	Correction for an issue recently observed at the factory in which RealPresence Group systems restarted intermittently while in a call; replaces 4.0.0.
4.0.0	November 2012	First release of software to support the RealPresence Group 300 and 500 systems.

## Language Support

The RealPresence Group Series system web and local user interfaces provide support for the following languages:

- Arabic
- Chinese (Simplified)
- Chinese (Traditional)
- British English
- American English
- French
- German

- Hungarian
- Italian
- Japanese
- Korean
- Norwegian
- Polish
- Portuguese (Brazilian)
- Russian
- Spanish

## Resolved Issues

The following table lists the resolved issues for the version 6.2.0 release:

### Resolved Issues in Version 6.2.0

Category	Key	Resolved Issues
Alert Management	EN-88289	A request to auto pop-up text box when a user dials into a meeting that requires a meeting password as there are too many pop-up text boxes in the RealPresence Group Series system.
Alert Management	EN-32919	When the mute button on IR remote is tapped couple of times, the RealPresence Group Series system occasionally displays wrong mute status
API	EN-102163	When the RealPresence Group Series system boots up, it occasionally shows no response for API commands through serial port. Reboot to recover.
Application	EN-97839	In the RealPresence Touch system, the user was unable to save far end preset settings
Application	EN-94270	In a Skype for Business call, when all the far ends participants put video on mute, the RealPresence Group Series system shows background wallpaper image instead of mute icon.
Application	EN- 81389	The RealPresence Group system unregisters from Skype for Business when you change the IP address of the RealPresence Group Series system manually.
Audio	EN-107892	In a Skype for Business call, the RealPresence Group Series system occasionally failed to mute other participants.
Call Management	EN-106883	In an Immersive Telepresence room, when the RealPresence Group Series system is rebooted, the "Enable Audio-Only Calls" checkbox automatically gets disabled
Call Management	EN-90489	The user is unable to place a call when the RealPresence Group Series system endpoints set up IP v6 to use the Site-Local Address

**Resolved Issues in Version 6.2.0**

<b>Category</b>	<b>Key</b>	<b>Resolved Issues</b>
Call Management	EN-84621	When the Media Suite Recording Service is disabled on the RealPresence Group Series system, the user is able to view the Recording Button in the RealPresence Touch system.
Calling	EN-105383	In a routed mode, when the user tries to call the RealPresence Group Series system, fails to dial an inbound H.323 call when an entry in recent calls list is selected
Configuration	EN-103499	The RealPresence Group Series system is unable to register to Exchange Server when provisioned and the "Auto Discover Exchange Server" option is enabled in the RealPresence Resource Manager
Configuration	EN-90878	When a user is in Skype for Business mode, the RealPresence Touch User interface displays self view problem.
Configuration	EN-110372	The RealPresence Group Series system is unable to register after server applied the policy to check the User-Agent in Http requests.
Configuration	EN-97733	On an active call, when the RealPresence Group Series system is not sending "BandwidthRequest", the call bit rate is showing 2592 kbps in DMA instead of 1024 kbps while the RealPresence Collaboration Server (RMX) and RealPresence Group Series system shows 1024 kbps
Content	EN -111895	When the RealPresence Group Series system running in Visual Board mode, the changed content when exchanged back to GS A from GS B system through the Visual Board is lost.
Content	EN-95277	In a large Skype for Business conference, the RealPresence Group Series system shows video and content related issues.
Content	EN-77220	In a Skype for Business online meeting, the VbSS content shared from the RealPresence Group Series system is delayed and displays poor quality.
Content	EN-14150	If monitor 2 is turned off, RDP content might be presented in PIP layout mode instead of full screen mode on monitor 1.
General	EN-109583	When the Japanese character names are entered in favorites in RealPresence Group Series system, the names are displayed in simple Chinese characters on embedded user interface.
Interoperability	EN-102267	When the Real Presence Group Series system receives INVITE message with no SDP, it rejects incoming SIP call with "415 Unsupported Media Type".
Interoperability	EN-7514	The Lync Macintosh client displays jerky video in calls to a RealPresence Group Series system.
Network	EN-97436	The RealPresence Touch system IP address is occasionally displayed as 0.0.0.0 when it is successfully paired with a RealPresence Group Series system.
Peripherals	EN-98741	When multiple cameras are connected, the RealPresence Group Series system 700 occasionally reboots while switching between the cameras.

**Resolved Issues in Version 6.2.0**

Category	Key	Resolved Issues
Peripherals	EN-68212	In a large Skype for Business AVMCU conference call with Remote Desktop Protocol (RDP) content, the RealPresence Touch device sometimes stops responding and loses pairing with RealPresence Group Series system when having large number of participants.
Peripherals	EN-12762	The camera on HDCI port does not power up to the same location where the HDMI source was connected to the same input in sleep mode.
Provisioning	EN-109238	During provisioning, the RealPresence Group Series system would crash occasionally.
Security	EN-84481	The Polycom Touch Control system gets unpaired from the RealPresence Group Series system when the user enables "Disable TLS v1.0" checkbox.
User Interface	EN-95631	The recording button is visible on the RealPresence Touch device even when the recording service is disabled in the RealPresence Group Series system.
User Interface	EN-101489	When the RealPresence Touch software is upgraded to version 6.1.5, the speed dial icon will not be displayed.
User Interface	EN-70777	When the RealPresence Group Series 310 system is not in Skype mode, the user is unable to add more than 2 Skype for Business participants in the AVMCU call at a time from RealPresence Touch system
User Interface	EN-75157	The RealPresence Touch device web interface displays the older software version after a software update.
Video	EN-85565	In a Skype for Business call with a Citrix client, the RealPresence Group Series system transmits low-resolution video and fails to decrypt SRTP received from the Citrix client.
Video	EN-90063	The video quality displayed is very poor in RealPresence Group Series system 310 when a Skype for Business call is made to a iOS client.
Video	EN-106218	In a AVMCU call, the self-view monitor flickers/blinks when the active speaker switches in the RealPresence Group Series system connected to dual monitor setup.

## Known Issues

The following table lists the known issues for the version 6.2.0 release. If a workaround is available, it is noted in the table.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Audio	EN-12767	When M-Mode is enabled, the RealPresence Group Series system cannot receive audio from a Polycom QDX 6000 system.	Disable M-Mode on the RealPresence Group Series system.
Calendering	EN-13505	The RealPresence Group Series system local interface and the RealPresence Touch device sometimes displays only nine participants, even though the Calendar invitation includes more attendees.	No workaround.
Call Management	EN-96750	In a AVMCU call, the call should not be placed on HOLD while the content is about to be received by the RealPresence Group Series system	No workaround.
Call Management	EN-98638	In a Point to Point call, while trying to add an invalid participant and escalate to AVMCU server, the RealPresence Group Series system fails to send the failure message.	No workaround.
Call Management	EN-85705	When RealPresence Touch is in Skype for Business mode, adding participant to the meeting fails from RealPresence Touch.	The dialing preference must be set to SIP instead of H.323
Call Management	EN-14149	When initiating a multipoint call, you might not be able to include audio endpoints and video endpoints in the same call.	Dial audio endpoints separately from the video calls.
Calling	EN-15575	When you connect a SoundStation IP 7000 phone to a RealPresence Group Series system, blast dialing endpoints might fail.	Disconnect the SoundStation IP 7000 phone from the system before you attempt a blast dial call.
Calling	EN-68097	In a call, when user tries to add another PSTN participant to the call, the RealPresence Group Series system fails to escalate the call to AVMCU.	No workaround.
Calling	EN-91123	During a large AVMCU conference call, the performance of the RealPresence Group Series system degrades when many messages are received from AVMCU server.	Disable the SIP/H.323 debug.
Calling	EN-84036	In a large AVMCU conference call, the state of Mute-All button does not update.	No workaround.
Configuration	EN-98284	Due to lighttpd limitations of uploading huge files, the file upload failed occasionally while doing manual software updates	No workaround.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Configuration	EN-94919	The RealPresence Touch system gets unpaired from the RealPresence Group Series system while transferring the update package to perform a manual upgrade. This is due to lighttpd utilizing the entire bandwidth to upload the package	No workaround.
Configuration	EN-12795	The Picture-In-Picture configuration option is only applicable when Tracking mode is set to Frame Speaker, but the option is available for all Tracking modes.	No workaround.
Configuration	EN-10869	If the SIP registrar password includes a backslash character, RealPresence Group Series systems might have failed to register with the SIP server.	Do not use the "\" character in the SIP registrar password.
Configuration	EN-10678	If dual stack (IP v4 and IP v6) is enabled, the RealPresence Group Series system fails to navigate from an IP v4 address to an IP v6 address.	When dual stack is enabled, enter an IP v6 DNS server address as the first DNS entry.
Configuration	EN-68043	When the SIP server is down and the SIP failover server is configured with another domain, the RealPresence Group Series system fails to register the Skype for Business client to the failover server.	Username should be configured as "domain\username" to successfully register in the failover environment.
Configuration	VIDESC-18013	A RealPresence Group Series system fails to re-register with Skype for Business Online when IP is changed.	No workaround.
Configuration	VIDESC-16992 EN-19259	A RealPresence Group Series system fails to restore the configuration details of the RealPresence Touch home screen button when system configuration is restored from system profile.	Manually reconfigure the home screen of RealPresence Touch device in the web user interface of RealPresence Group Series system.
Configuration	EN-17366	The value of "Transfer Frequency" under "Log Management" changes to "Manual" from "Auto At Threshold", when system profile is exported and re-imported to the RealPresence Group Series system.	No workaround.
Configuration	EN-114421	When PAC URL is configured through DHCP option 252 in Infoblox DHCP server, a null character is appended.	No workaround.
Configuration	EN-114594	The call drops during a TIP call when the RealPresence Group Series system encryption is set to "required for video calls only"	No workaround.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Content	EN-104903	The RealPresence Group Series system displays the received content slowly on the monitor, when the content is above 2k resolution	No workaround.
Content	EN-86253	When the RealPresence Group Series system, Microsoft desktop sharing mode is changed from "Disable" to "VBSS" or vice-versa, the video output port changes to the RealPresence group Series system due to hardware limitations	No workaround.
Content	EN-85843	In Skype mode, there is no Visual Board support on the RealPresence Touch system, when content is shared via VisualBoard from RealPresence Group Series web user interface.	No workaround.
Content	EN-97384	In a Skype for Business Online environment, the RealPresence Group Series system is occasionally delayed in displaying Remote Desktop Protocol (RDP) content.	No workaround.
Content	EN-97384	In a Skype for Business Online environment, the RealPresence Group Series system is occasionally delayed in displaying Remote Desktop Protocol (RDP) content.	No workaround.
Content	EN-48589	In a RealPresence Group Series conference call, content is shared using Polycom® Pano™. When you stop RealPresence Touch device content and start content using Polycom Pano, the RealPresence Group Series system local interface displays a black screen.	Use Polycom Pano to share content again.
Content	EN-12332	In H.323 calls above 1472 kbps, the RealPresence Group Series system might receive black video when sharing content in a RealPresence Collaboration Server (RMX) call.	No workaround.
Content	EN-25127	In some scenarios, Skype for Business desktop and window sharing might take up to 15 seconds to be received.	No workaround.
Content	EN-19994	The Polycom Touch Control device might not be able to send content from a USB-connected local computer running Windows 10.	No workaround.
Content	EN-10990	When a RealPresence Group Series system shares content in a long duration, multi-point call, the content may be sent over the people channel instead of the video channel.	Hang up the call, redial the call, and restart content.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Content	EN-64828	In a conference call, when a computer is sharing content to RealPresence Group Series using Polycom® People+Content® IP (PPCIP) and another computer tries to share content by entering an incorrect password, the content shared from the first computer disconnects.	Share content from second computer using correct password.
Content	EN-80601	In a large conference AVMCU call, the RealPresence Group Series system stops responding when the displayed content is switched from Video-based Screen Sharing (VbSS) to Remote Desktop Protocol (RDP).	Either use VbSS or RDP to share content.
Directories/Address Books	EN-26786	On the home page Contacts tab of the RealPresence Group Series system web interface, the Global Entry link is displayed based upon client policy. The link is displayed when a user has a client policy with address book availability configured to WebSearchAndFileDownload. The link is not displayed when a user's client policy with address book availability is changed to WebSearchOnly.	No workaround.
Directories/Address Books	EN-17737	In the Call Detail Report of a RealPresence Group Series system, the RealPresence Touch device is listed as "ptc" in the "View Name" column.	No workaround.
Hardware	EN-86251	When the RealPresence Group Series system mode is changed from "Disable" to "VBSS" or vice-versa, the video output port changes from RealPresence group Series system due to hardware limitations	No workaround.
Installation	EN-23562	When a RealPresence Touch device is not paired with a version 6.1.2 RealPresence Group Series system, a device software upgrade from version 2.1.1 to 2.1.2 using the Polycom software server might fail.	Before you upgrade the RealPresence Touch device software to version 2.1.2, pair the device with a version 6.1.2 RealPresence Group Series system.
Installation	EN-24249	Performing a platform software downgrade using a USB storage device might cause the RealPresence Touch device to stop the downgrade process and restart.	Do not use a USB storage device. Instead, perform a downgrade using RealPresence Resource Manager and an HTTP server.
Interoperability	EN-91394	A RealPresence Group Series system registered in an Avaya environment restarts when a video call with Avaya 9641GS IP desk phone using RealPresence Touch device fails.	No workaround.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Interoperability	EN-10812	A RealPresence Group Series system connected to Polycom ISDN Gateway with stereo enabled is unable to connect to an audio-only call.	No workaround.
Interoperability	EN-19586	On the RealPresence Group Series remote control, DTMF conference controls might not work in an AV MCU conference.	Use the RealPresence Touch device in Office 365 mode or use another Office 365 client to control the meeting.
Interoperability	EN-18207	The Office 365 environment does not support FIPS mode.	Disable FIPS mode in Office 365 environments.
Interoperability	EN-14154	When in a SIP call using Microsoft remote desktop registered to the RealPresence DMA system, RealPresence Group Series systems registered to Lync disconnect after pressing Hold on RealPresence Group Series systems.	No workaround.
Interoperability	EN-14151	In Unify server environments, you might not be able to resume held calls after the call was transferred on a RealPresence Group Series system.	Do not transfer held calls involving a RealPresence Group Series system in a Unify environment.
Interoperability	EN-63382	When a RealPresence Group Series system places a 128 bit encrypted call to Avaya XT7000 or XT5000, there is no audio or video.	Set encryption key to 256 on all endpoints.
Interoperability	EN-12773	While in Skype for Business mode, you might not be able to place a video call from the RealPresence Group Series system to voice mail.	Select the audio toggle on the RealPresence Touch device to make an audio call to the voice mail.
Interoperability	EN-10837	After a DNS failure during a call between a Polycom Trio conference phone and a RealPresence Group Series system, the Polycom Trio conference phone does not automatically disconnect from the call.	Manually disconnect the Polycom Trio conference phone from the call.
Interoperability	EN-7517	When dialing multiple Skype for Business clients at the same time, the call connects as audio-only.	Set the dialing preference to SIP. In Office 365 environments, disable H.323.
Network	EN-108475	Due to network issue on the AVMCU server, the RealPresence Group Series system suddenly reboot and displays black video	No workaround.
Network	EN-115577	In the RealPresence Group Series system during the software upgrade, the system occasionally hangs for more than 30 minutes and needs a manual reboot.	Press and hold the power button on the front panel for 10 seconds. If that doesn't work, then pull the power cord.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
Peripherals	EN-14156	The USB 3.0 ports on the backpanel of RealPresence Group Series 700 systems do not support USB headsets.	No workaround.
Peripherals	EN-14094	After the EagleEye Director II wakes from sleep, the EagleEye IV camera might not automatically move to the preset position.	Use the system local interface or the RealPresence Touch device to select the preset and the camera moves to selected preset position.
Peripherals	EN-17556	Camera 3 does not appear as content input on a RealPresence Touch device, when the Camera 3 HDMI input is connected via DVI input format.	No workaround.
Peripherals, Calling	EN-90212	In a Skype for Business video call, the RealPresence Touch device occasionally stops responding.	No workaround.
User Interface	EN-100580	When the RealPresence Group Series is in Audio AVMCU call and sharing VBSS content, if the call is changed from audio to video through RealPresence Touch, the RealPresence Group series fails to transmit the video.	No workaround.
User Interface	EN-87440	The RealPresence Group Series system fails to register with a Skype for Business client if the Skype for Business password contains double quotation marks.	No workaround.
User Interface	EN-68030	In a call, the TV user interface displays the RealPresence Group Series system name instead of the SIP username for the far-end system.	No workaround.
User Interface	EN-23394	When you end a call, the RealPresence Touch device is intermittently slow to respond.	No workaround.
User Interface	EN-20175	When a RealPresence Group Series system joins a CCCP conference as an audio-only PSTN endpoint, the call might be connected as audio/video. As a result, the PSTN party displays black video to the other participants.	No workaround.
User Interface	EN-17594	If a RealPresence Group Series system has Automatic Self View and Self View disabled, with the monitor 1 profile set to Far, then Content, then Near, and monitor 2 profile set to Far, then Near, the following scenario might occur. Three identical layout choices might display on the local interface and on the RealPresence Touch device.	No workaround.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
User Interface	EN-17107	In a call with monitor 1 set to Far, then Content, then Near, and monitor 2 set to Far, then Near with Automatic Self View Control enabled, the following scenario occurs. Far-end video displays full screen on monitor 2 and monitor 1 displays the background image in full screen (if configured) or black video (if not configured) with its local video in PIP.	No workaround.
User Interface	EN-16260	When the Restrict to HTTPS setting is enabled on a RealPresence Group Series system, the paired RealPresence Touch device might not download device's application software.	No workaround.
User Interface	EN-64672	In a Skype for Business call when all the attendees are muted, the RealPresence Group Series system does not show attendee's video even after the organizer blocks and unblocks attendee's video.	Change the layout on RealPresence Group Series system.
User Interface	EN-19922	Far-end site camera presets are not available on RealPresence Touch devices.	No workaround.
User Interface	EN-19843	If you are logged out of the RealPresence Touch web interface, the device screen might not refresh automatically and might continue to display the same screen and the login dialog.	No workaround.
User Interface	EN-15879	The Log Stamp feature might not display in the Polycom labs feature list in the system web interface.	Clear the <b>Enable Polycom Labs Feature</b> check box, then select it.
User Interface	EN-14153	System information and user settings are not available when the RealPresence Touch device is not paired.	Pair to a RealPresence Group Series system to view the information, or use the RealPresence Touch web interface to view the information (IP address is available in the unpaired screen).
User Interface	EN-14148	After completing the setup wizard, you might see the Hello screen flash and hear a welcome sound before the logon screen displays.	No workaround.
User Interface	EN-11236	On RealPresence Touch devices, the Help Desk number might display as a regular PSTN call on the participant list.	No workaround.
User Interface	EN-10984	If you enter an incorrect system password then change the Lock Port After Failed Login setting in the web interface, the system is locked out after the third password attempt, regardless of the setting value.	No workaround.

**Known Issues in Version 6.2.0**

Category	Issue ID	Description	Workaround
User Interface	EN-10956	On some touch monitors, the virtual keyboard might not display during a call on RealPresence Group Series 500 and 700 systems.	End and redial the call.
User Interface	VIDESC-17011 EN-19622	When a SoundStation IP 7000 system connected to a RealPresence Group Series system makes a video call, the Call Detail report of RealPresence Group Series system displays "—" in the call details in "View Name" column.	No workaround.
Video	EN-59502	The SmartPairing feature is not supported on RealPresence Group Series systems.	No workaround.
Video	EN-76550	When a Skype for Business client shares a window using dual monitor with extended display, the content received is displayed on half of the screen of the RealPresence Group Series system monitor.	Use Desktop option and specify the monitor to share content.

This document includes known issues for RealPresence Group Series systems deployed in Avaya, Broadsoft, IBM, Siemens, Microsoft, and Cisco environments. For more information about those environments, refer to the Polycom release notes for those solutions at [Strategic Partner Solutions](#).

## Limitations

The following are a list of limitations to features and functionalities in this release:

### ***Skype for Business Server Interoperability***

The RealPresence Group Series system supports up to 250 participants in a Skype for Business call.

Polycom recommends that you avoid sharing high motion Remote Desktop Protocol (RDP) content for better audio, video, and content quality.

### ***Microsoft Office 365***

When migrating an Office 365 On-premises account to online, the system's local or web interface may indicate that it is registered when the process has not yet completed on the server end. If a system is not able to make a call after migration, wait a few minutes and try again. The migration process can take 30 minutes or more to complete.

Prior to registering an Office 365 account with a RealPresence Group Series system that is set to auto configuration, you must make sure the server and proxy addresses have been cleared. If you have entered specific server addresses into the address fields Registrar server and Proxy server at **Admin Settings > Network > IP Network > SIP**, before you change the SIP Server Configuration setting from **Specify** to **Auto**, you must clear the address fields and then click **Save**. If the server fields are not cleared, SIP registration might fail.

### ***Cn Attribute Searches***

RealPresence Group Series systems do not support `cn` (common name) RealPresence Resource Manager attribute searches. When you perform `cn` searches the system automatically uses `displayname` instead.

### ***Samsung SyncMaster TA350 Monitor***

When you connect a Samsung SyncMaster TA350 monitor to a RealPresence Group Series system as a second monitor and you enable the **Dual Display** option in the web interface, the brightness controls on the second monitor do not work. As a workaround, disconnect the HDMI cable from the Samsung SyncMaster TA350 monitor and then reconnect it.

### ***Wireless Mice***

Wireless mice that are connected to RealPresence Group Series systems may not function properly with the VisualBoard application and are not recommended.

## Camera 2 and VisualBoard CSC Usage

Camera 2 and the VisualBoard application share a single color space converter (CSC). If a CSC is used for VisualBoard, it cannot simultaneously be used for camera 2 as people video.

## Update to Account IDs

The text string `root` is no longer allowed when configuring the ID for the administrator or user account on a RealPresence Group Series system. Attempting to set either account to any variance of `root` results in an error.

If you upgrade to RealPresence Group Series 6.0.1 or higher on a system that is running software version 6.0.0 or earlier and the value of an account ID is set to any variance of `root`, the following modifications will be made automatically during the upgrade process:

- The Admin ID will be changed to the default Admin ID: `admin`
- The User ID will be changed to the default User ID: `user`

The existing password is not modified.

## Third Party Cameras

For third-party cameras connected to a RealPresence Group Series system, pan, tilt, and zoom are supported; however, the cameras may not accurately respond to and move into preset camera positions. Advanced camera functionalities such as Backlight Compensation, White Balance, and Brightness and Color Saturation are not supported.

For more information about supported third-party cameras, see the *Polycom RealPresence Group Series Integrator Reference Guide*.

## Interoperability

Video conferencing systems use a variety of algorithms to compress audio and video. In a call between two systems, each end transmits audio and video using algorithms supported by the other end. In some cases, a system might transmit a different algorithm than it receives. This process occurs because each system independently selects the optimum algorithms for a particular call, and different products might make different selections. This process should not affect the quality of the call.

For more information about using Polycom RealPresence Group Systems as part of a Polycom-partner product solution, refer to the Polycom-partner product deployment guides available at [Polycom Support](#).

## Products Tested in this Release

Polycom RealPresence Group Systems are tested extensively with a wide range of products. The following list is not a complete inventory of compatible equipment. It simply indicates the products that have been tested for compatibility with this release. For Polycom peripherals that are compatible with the RealPresence Group systems, refer to [Hardware and Software Compatibility](#).

Polycom strives to support any system that is standards-compliant and investigates reports of Polycom systems that are not interoperable with other vendor systems.

Polycom recommends that you upgrade all of your Polycom systems with the latest software versions. Any compatibility issues may already have been addressed by software updates. Go to [PolycomService/support/us/support/service\\_policies.html](https://PolycomService/support/us/support/service_policies.html) to see the Current Polycom Interoperability Matrix.

Product	Interoperable Versions
<b>Management Systems and Recorders</b>	
Polycom RSS™ 4000	8.5.4
Polycom® RealPresence® Access Director™	4.2.4
Polycom® RealPresence® Media Suite	2.8.2
Polycom® RealPresence® DMA®	6.4.X and 9.0.1
Polycom® RealPresence® Resource Manager	10.1.0
<b>Gatekeeper, Gateways, External MCU, Bridges, Call Managers</b>	
Avaya Aura® Communication Manager	R017x.00.0.441.0
Avaya Aura® Session Manager	7.0.0.0.0.700007
Cisco® TelePresence® Video Communication Server (VCS)	X8.10
BroadSoft Server	R21.sp1_1.551
Sonus SBC	05.00.02-R000
Cisco Unified Communications Manager	11.5.1
Codian 4505 MCU	4.5 (1.85)
Cisco 3241 ISDN Gateway	2.2 (1.27)
Cisco 5310 MCU	4.5 (1.85)
Cisco 8710 MCU	4.2 (4.18)
OpenScape Voice	V8 R1.47.1
OpenScape UC	V7 R3.0.11
OpenScape SBC	V8 R1.12.00
OpenScape Branch	V8 R1.02.00
Polycom® RealPresence® Collaboration Server 1500	8.5.12
Polycom® RealPresence® Collaboration Server 1800/4000	8.7.4
Polycom® RealPresence® Collaboration Server 800, Virtual Edition	8.7.4

<b>Product</b>	<b>Interoperable Versions</b>
Polycom® RealPresence® Collaboration Server Gateway	8.7.3

Polycom EagleEye Director II	2.1.0.5
Polycom RealPresence Touch	6.2.0 Panel software 2.2.0 Operating System software
Polycom Touch Control	6.2.0 Panel software 6.2.0 Operating System software
Polycom VisualBoard Application	4.1.3 software and later

<sup>1</sup> The RealPresence Group Series systems do not receive video from the Radvision Scopia 100 P10 gateway.

## ***Microsoft Interoperability***

RealPresence Group Series systems support interoperability with the following Microsoft software versions.

### **Servers**

<b>Product Name</b>	<b>Version</b>
Microsoft Skype for Business Server 2015 (Feb. 2017)	6.0.9319.534
Microsoft Lync Server 2013	5.0.8308.1001
Microsoft Exchange Server 2013	15.00.1395.004 CU21
Microsoft Skype for Business Online	Versions updated regularly and hosted by Microsoft
Microsoft Exchange Server Online	Versions updated regularly and hosted by Microsoft

### **Clients**

<b>Product Name</b>	<b>Version</b>
Microsoft Skype for Business 2015	15.0.5075.1000
Microsoft Lync 2013	15.0.4701.1000
Windows client	16.0.9126.2282, 16.0.9126.2295
Mac client	16.20.90, 16.21.65, 16.21.87
Surface Hub	1703(KB4477029)
Skype Room System v1 (Polycom CX8000)	1.00.11
Polycom® RealConnect™ Solution	Supported
Skype Room System v2	Not supported

## ***Cisco and TIP Interoperability***

The RealPresence Group Series systems support interoperability with the following Cisco equipment and TIP protocols:

- Cisco TelePresence System 1.10.15 (4) interoperability (People video 1080p resolution at 30 Hz; content frame rate for XGA at 5 fps)
- Cisco TelePresence System next generation interoperability with TIP Version 7
- Cisco TX Series Version 6.1.12
- Cisco IX5000 Version 8.1.2 (12)
- Cisco TelePresence Server 4.2 (4.18)

The following features are not supported in this release:

- Media encryption through Datagram Transport Layer Security (DTLS) or Standard SRTP (SDS)
- Secure registration to Cisco Unified Communications Manager.

## Hardware and Software Compatibility

The following table lists RealPresence Group Series system software versions that are compatible with RealPresence Group Series system hardware.

Polycom recommends that you upgrade all of your Polycom systems with the latest software versions. Any compatibility issues may already have been addressed by software updates. Go to <https://support.polycom.com/content/support/service-policies.html> to see the Current Polycom Interoperability Matrix.

Hardware Model	Part Number (or Serial Number)	Designation in User Interfaces	Compatible Software Versions
RealPresence Group 700	2201-84248-xxx	Hardware version 20	6.0.1 and higher
RealPresence Group 700	2201-08090-xxx	Hardware version 7 Hardware version 8	4.1.3 and higher 4.1.3 and higher
RealPresence Group 700	2201-09770-xxx	Hardware version 6 Hardware version 7	4.0.2 and higher 4.1.3 and higher
RealPresence Group 500	2201-61078-xxx	Hardware version 20	4.2.0 and higher
RealPresence Group 500	2201-68113-xxx	Hardware version 16 Hardware version 18	4.2.0 and higher 4.2.0 and higher
RealPresence Group 500	2201-09790-xxx	Hardware version 9 Hardware version 10 Hardware version 12 Hardware version 15 Hardware Version 17	4.0.0 and higher 4.1.3 and higher 4.1.3 and higher 4.1.3 and higher 4.2.0 and higher
RealPresence Group 310	2201-61079-xxx	Hardware version 20	4.3.0 and higher
RealPresence Group 310	2201-68113-xxx	Hardware version 16 Hardware version 18	4.3.0 and higher 4.3.0 and higher
RealPresence Group 300	2201-68108-xxx	Hardware version 16 Hardware version 18	4.2.0 and higher 4.2.0 and higher
RealPresence Group 300	2201-64752-xxx	Hardware version 9 Hardware version 10 Hardware version 12 Hardware version 15 Hardware version 17	4.0.0 and higher 4.1.3 and higher 4.1.3 and higher 4.1.3 and higher 4.2.0 and higher
RealPresence Touch	2200-84709-xxx	Hardware version 7	6.1.2 and higher

## Supported Operating Systems and Web Browsers

The RealPresence Group Series system web interface is supported on the following web browsers and operating systems:

- Microsoft® Internet Explorer 10 or 11 on Windows 8
- Apple® Safari® 9.0.3 on Mac OS® X (Yosemite)
- Mozilla Firefox 44 on Windows 8

## Supported Peripherals

RealPresence Group Series systems support the following peripherals:

- Polycom EagleEye Producer
- Polycom EagleEye Director II
- Polycom EagleEye Director
- Polycom RealPresence Touch
- Polycom Touch Control
- Polycom EagleEye Acoustic, EagleEye III, EagleEye II, EagleEye 1080, EagleEye View, EagleEye HD, and EagleEye IV cameras
- Polycom RealPresence Group Microphone Array
- Polycom HDX system table microphone arrays and ceiling microphone arrays
- Polycom SoundStructure
- Polycom Stereo Speaker Kit
- Polycom SoundStation IP 7000 phone

For specific version support information, see [Products Tested in this Release](#).

## Supported Touch-Capable Monitors

The touch-enabled user interface and VisualBoard are compatible with the following touch-capable monitors.

Brand	Model	Size
Acer	T232HL	23"
Acer	T272HL	27"
HP Compaq	L2206tm	22"
LG	LG KT-T430 overlay on LG-43SL5B LG-43SE3B	43"
LG	LG KT-T490 overlay on LG-49SL5B LG-49SE3B	49"

Brand	Model	Size
LG	LG KT-T550 touch overlay on LG 55SL5B LG-55SE3B	55"
LG	LG KT-T650 touch overlay on LG 65LS33A	65"
NEC	V552TM	55"
Orion	Orion OLS-7010T6	70"
Planar	PCT2785	27"
Sharp	PN-L702B PN-L703B	70"

RealPresence Group Series system supports only HID-compliant monitors.

**Trademarks** Polycom®, the Polycom logo and the names and marks associated with Polycom products are trademarks and/or service marks of Polycom, Inc. and are registered and/or common law marks in the United States and various other countries.

All other trademarks are property of their respective owners. No portion hereof may be reproduced or transmitted in any form or by any means, for any purpose other than the recipient's personal use, without the express written permission of Polycom.

**End User License Agreement** By installing, copying, or otherwise using this product, you acknowledge that you have read, understand and agree to be bound by the terms and conditions of the End User License Agreement for this product. The EULA for this product is available on the Polycom Support page for the product.

**Patent Information** The accompanying product may be protected by one or more U.S. and foreign patents and/or pending patent applications held by Polycom, Inc.

**Open Source Software Used in this Product** This product may contain open source software. You may receive the open source software from Polycom up to three (3) years after the distribution date of the applicable product or software at a charge not greater than the cost to Polycom of shipping or distributing the software to you. To receive software information, as well as the open source software code used in this product, contact Polycom by email at [OpenSourceVideo@polycom.com](mailto:OpenSourceVideo@polycom.com).

**Disclaimer** While Polycom uses reasonable efforts to include accurate and up-to-date information in this document, Polycom makes no warranties or representations as to its accuracy. Polycom assumes no liability or responsibility for any typographical or other errors or omissions in the content of this document.

**Limitation of Liability** Polycom and/or its respective suppliers make no representations about the suitability of the information contained in this document for any purpose. Information is provided "as is" without warranty of any kind and is subject to change without notice. The entire risk arising out of its use remains with the recipient. In no event shall Polycom and/or its respective suppliers be liable for any direct, consequential, incidental, special, punitive or other damages whatsoever (including without limitation, damages for loss of business profits, business interruption, or loss of business information), even if Polycom has been advised of the possibility of such damages.

**Customer Feedback** We are striving to improve our documentation quality and we appreciate your feedback. Email your opinions and comments to [DocumentationFeedback@polycom.com](mailto:DocumentationFeedback@polycom.com).

**Polycom Support** Visit the [Polycom Support Center](#) for End User License Agreements, software downloads, product documents, product licenses, troubleshooting tips, service requests, and more.
