Five ways Polycom® RealPresence® CloudAXIS™ Suite forever changes how teachers teach and students learn.

By extending face-to-face collaboration to anyone with a web browser on their computer, smartphone or tablet, Polycom RealPresence CloudAXIS Suite delivers secure, enterprise-grade video collaboration and video content management to a wide range of educational institutions and groups. The result: a totally evolved learning experience for a rapidly developing educational landscape.

TRANSFORMED CLASSROOMS.

TODAY video-equipped classrooms bear little resemblance to lecture halls of yesterday. RealPresence CloudAXIS enhances engagement between student and teacher, leading to improved instruction and closer interaction. Students collaborate more with each other through online discussions and content-sharing, while remote guest experts and virtual field trips become the norm. Higher student involvement and lower attrition often follow.

EXTENDED REACH.

TODAY recorded real-time and on-demand lectures via RealPresence CloudAXIS reach learning partners around the world. Programs expand far beyond the campus, connecting students and faculty to each other face-to-face, at any time, from multiple modalities. Learners and teachers can collaborate with literally anyone with Internet access. Education—not location—becomes the true focus, and knowledge transfer becomes more immediate and efficient than ever before.

INCREASED SAVINGS.

TODAY RealPresence CloudAXIS turns global collaboration into a cost saver. With browser-based access, students and resources are more accessible, reducing faculty travel and strengthening ties to alumni, donors and business. Connections are added without cost or complexity, and virtual capacity allows for expanded enrollment.

FLIPPED LEARNING.

TODAY RealPresence CloudAXIS provides an education that’s in line with the modern world—and future employers. Flipped Learning allows lectures to be prerecorded, attended and revisited conveniently on demand, all according to student schedules. The emphasis in class becomes student-centered, creating learners who are more engaged, capable and equipped with stronger critical-thinking skills.

ADMINISTRATIVE EXCELLENCE.

TODAY video innovation isn’t limited to the classroom. The RealPresence CloudAXIS platform makes administrative staff highly mobile and accessible. Meetings are attended without leaving the office, home or dorm. Remote students and contacts receive immediate, needed outreach such as student services. Professional development, training and certification programs are accessed easily and with better results.

A LARGER CAMPUS FOOTPRINT. A GREATER OPPORTUNITY TO LEARN.

THIS IS THE FUTURE OF EDUCATION.

Get started on that future today with Polycom RealPresence CloudAXIS—available NOW.
